Office Action Summary	Application No. 10/603,671	Applicant(s) WODOK & GENESIUS	
	Examiner Renee S. Luebke	Art Unit 2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2833

1. The new drawings, title and abstract are appreciated, and have been entered.

2. Claims 6 and 10-13 are objected to because of the following informalities:

- Claim 6 lacks antecedent basis for “the one hand side” on line 5 and “the other hand side” on line 6.

- The last section of claim 10 is unclear. As presented, it indicates that the first and second contact elements are connected with the guide means. This contradicts a previous limitation (and applicant’s remarks).

Appropriate corrections are required.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1-4 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansen.

In regard to claim 1, this connector comprises a first connector having an insulating body 5, first contact elements 25, and a catching area with guide means 19. The perimeter of the guide means forms a rectangle. It operates as claimed. Contrary to applicant’s remarks, claim 1 does not positively recite that the connector includes a second connector.

Applicant also asserts, without support, that the transistor prongs of Hansen cannot be both contact elements and guide means. However, the claim limitations do not prevent this interpretation.

Applicant did not separately argue the patentability of dependent claims 2-4 and 9.

Art Unit: 2833

5. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8 is allowed.

Claims 10-13 appear to be allowable if rewritten or amended to overcome the objections set forth in this Office action.

6. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. It is suggested that responses to this final action be faxed to:
(703) 872-9306

Please refrain from sending a confirmation copy, as noted in 37 CFR 1.6(d) and 1.8(b).

Alternatively, responses may be mailed to:
